**Art Unit: 1732** 

Restriction to one of the following inventions is required under 35
 U.S.C. 121:

- I. Claims 1-21, drawn to a method of making a 3-D object, classified in class 264, subclass 308.
- II. Claims 22-24, drawn to the product produced by the method, classified in class 428, subclass 411.1+.
- III. Claims 25-26, drawn to a pulverent material, classified in class 525, subclass 50+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the can be made materially different process such as a laminating process rather than the 3-D layering process.

Application/Control Number: 10/665,472 Page 3

Art Unit: 1732

3. Inventions I and III are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case a different pulverent material than the Group III can be used in the process of group I and the pulverent material of the Group III claims

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

can be used in a different process than the process using 3-D layering.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/665,472

Art Unit: 1732

- 6. Because these inventions are distinct for the reasons given above and the search required for any one group is not required for the other group, restriction for examination purposes as indicated is proper.
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Lechert Jr. whose telephone number is 571-272-1203. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on
